

Definition/Description:

Environmental Initiatives in the WHR

Source:

Corporate Office
Community and Corporate Information Systems

Findings/Highlights:

- Aluminum can recycling, paper recycling, and printer toner cartridge recycling are practiced at the WRHA Corporate Office.
- Other sites and facilities, including Community Area offices also participate in recycling initiatives to varying degrees.
- Duplex printers are becoming more available within the organization and are coming to represent the norm, thereby reducing paper requirements.
- Computer hardware identified as no longer required by WRHA is recycled through donation to 'Computers for Schools', which then distributes it appropriately.
