

Site Locations of WRHA Health Services by Community Area

CHA REPORT 2004

Definition/Description:

Community Area boundary maps identifying health service sites that are fully or partially funded by the WRHA and include sites that receive funding based on service purchase agreements between the WRHA and the site or organization. It is important to note that there are other organizations providing health services in the community areas that are not included in this list or identified on these maps. Also, in some cases, the funded sites noted share physical space with other agencies, services and government departments that do not receive any funding from the WRHA.

Note: Maps are based on the 2000 WRHA Site Locations database.
